Background

Late in 2008 we were heartbroken to be told that our wee boy – Logan (aged 4) - was suffering from Duchenne Muscular Dystrophy (DMD). DMD is a genetic progressive muscle wasting disease almost exclusively affecting young boys.

Presently there is no cure for DMD – however things are changing. New Genetic research is underway making for the first time the dream of a treatment a realistic possibility.

There are, however, a great many costs that are associated with the care and well-being of boys with this condition and it is for this that Gareth is taking on this challenge.

All monies raised from this 'Fling for Logan' challenge will be used for this purpose.

Donna & Gareth Mitchelson

'Fling for Logan' challenge

Highland Dancing has been a huge part in Gareth & the entire Mitchelson clan's lives and Gareth has decided to appeal to the generosity and charity of the Highland Dancing community in his fund raising endeavours and is planning to undertake a 'Fling for Logan' challenge.

This will take the form of an old steps sponsored Highland Fling. However it will not be just any old sponsored Fling of 6 or 8 steps – Gareth has set himself the mind-blowing challenge of dancing a **40 step fling!**

Gareth is keen that this is not just 'another sponsored dance' where people sponsor / donate without being there to witness the event or getting real feedback and want the challenge to be as inclusive as possible and so the challenge will be videoed and made available for all to watch on this website and also on YouTube (hunt for 'Gareth Mitchelson' & 'Fling for Logan').

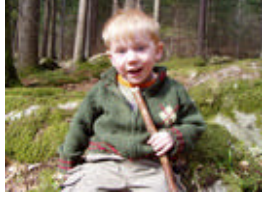

Gareth will be performing the challenge on 2 April 2009 – video footage will be posted on the challenge website – www.flingforlogan.com – immediately on its completion and all participating studios / classes / organisations will be emailed a copy of the video and a script of the steps danced.

All those involved in Highland Dancing will appreciate just how huge a challenge this is and he is asking for your support and encouragement.
